

Key Health Benefits of *Rebellious Infusions* [\(FAQs\)](#)

Rebellious Infusions Fuel the Brain, Reduce Stress, Improve Mood

Studies show that caffeine and L-theanine in green tea may provide cognitive benefits and improve mental clarity and work performance. [\(Link\)](#) Green tea antioxidants include the EGCG compound, which improves brain function. EGCGs demonstrated improved connectivity in sections of the brain, especially those associated with working memory. *Rebellious Infusions* could help alleviate the cognitive impairment induced by high-fat and high-fructose diets [\(Link\)](#) [\(Link\)](#)

Rebellious Infusions have ~300mg of Antioxidants per Serving [\(Link\)](#)

Antioxidants are essential for neutralizing and removing free radicals found in the bloodstream that can damage cells and cause disease. Every batch of *Rebellious Infusions* is tested to our specifications for high antioxidants are met. Green tea antioxidants are known to **reduce inflammation** and **improve digestion**.

Rebellious Infusions are Good for your Skin [\(Link\)](#)

Research indicates that inflammatory skin problems—characterized by patches of dry, red flaky skin—are reduced through green tea consumption. The antioxidants can help delay signs of aging such as fine lines, wrinkles and damage caused by sun exposure. Regular consumption of green tea flushes out unwanted toxins from the body, leaving you with healthy and supple skin.

Rebellious Infusions are Beneficial for Diabetics [\(Link\)](#)

Diabetes involves having elevated blood sugar levels in the context of insulin resistance or an inability to produce insulin. Studies show that green tea can improve insulin sensitivity. *Rebellious Infusions* have ZERO Sugar and do not change blood sugar levels.

Rebellious Infusions Fight Disease and Improve Dental Health [\(Link\)](#)

Streptococcus mutans is the primary harmful bacteria in the mouth. It causes plaque formation and is a leading contributor to cavities and tooth decay. Studies show that the catechins in green tea can inhibit the growth of *Streptococcus mutans*. Green tea consumption is associated with improved dental health and a lower risk of cavities. Multiple studies also show that green tea can reduce bad breath. [\(Link\)](#)

** Nearly all ready-to-drink “teas” lose the antioxidants, therefore the health benefits, with mass production. This is why they do not list the levels on package or on their websites. [\(Link\)](#) Rebellious Beverage Company’s mission is to provide true health benefits, in a great tasting and environmentally friendly package, while supporting great causes.
